**Der Franzose personally - The engine to get back to the roots.**

Since 30 years, he fell in love in the vintage cars and made a career out of his passion. In the following interview, Ansgar Olberding, managing director of Der Franzose Automobiltechnik tells us more about himself and the passion for the french vintage vehicles.

Since 30 years, he was wrenching on vintage cars. Already at the tender age of 20, he had a former hen-house full with cars which were out of order. Most of them were french one but there were also some italian ones. Later on, he finally had a garage, carports and halls. However, since years a dream came true - he has managed to get his own small personal workshop on his courtyard.

It is a small cosy workshop built with a swedish style with two lifting ramps. It even has a radiator. As they have two dogs, so one of them remains with him while he is wrenching and if he was a brave guy, his lovely wife calls him for coffee and home-baked cake.

He enjoys those Sunday morning where he can switch on his favourite music and inspect those old „carts“ if there is any „operations“ to be done. He, even excuses himself for this expression as there are some persons

who don't understand the passion of some for vintage cars.

Nevertheless, he considers those vehicles as time-machine! It reminds him of the young days. It is in fact a journey in the past and being on trip was simply wonderful, without any „beeps“ or any complicated buttons regulating the temperature automatically against his will.

Even after four apprenticeships, he got the feeling that none of those jobs really impressed him. Thus, he decided to do something where he could have fun doing it. He realized that he could make a career out of his hobby. And that's how his girlfriend (actually his wife) and himself decided to start a business selling spare parts for french vintage cars.

It was indeed a tough time at the beginning where there was not really a big earning. Nowadays, the team of Der Franzose consists of 24 employees, almost 40.000 customers spread in 80 countries and with 1.000.000 spare parts in the warehouse (one of the biggest warehouse worldwide for french classic cars), customer service with technical advice in french, english and german and other correspondences without technical advice additionally in italian, spanish, turkish and russian.

A branch in Paris has been established since 2010 and from the 24 employees, four of them are french native speaker who do their maximum to assist appr. 8000 customers in France.

The customers are spread worldwide and the team do their best to assist them by providing them of the required spare parts. Over 2.700 parts are dispatched daily, whether it is a screw, a filter, clutch sets, body panels or even chassis for the 2CV. Therefore, he is grateful to the whole involved staff for their team spirit which permits a successful and smooth operation, starting from the incoming goods department, sales and customer service department upto the shipping department.

Thanks to the modern logistic technology which enables a flexible management. Even though they are dealing with vintage cars, they indeed need the modern and sophisticated technology to improve the service. Thus, a new high-grade 3D-Scanner has been acquired for the measurement of some very rare parts to thousandths milimeter for digitalization later on. That's the irony of the success – dealing with vintage cars but depending on the high-end technology.

Nevertheless the way to this success was a long one. After years of hard work with 65 working hours per week but still no earnings and the anxiety of failing, he did not give up. For sure, it was a hard time but it was worthwhile! Today, he sees things with a much relaxed aspect – a reliable team and thus a much balanced workload.

And as we asked him about his goals, he is not interested in being the leading company in the world or even of owning a villa or the most expensive cars. His personal goal is to enjoy life to the fullest and enough leisure time! He only wants to have enough privacy and the possibility to cut off from all the modern media which are having too much importance nowadays in our lives. Anyway, he does not even have a good cellular network and has a very low internet connection at home. What an irony for someone who sells spare parts via a website! That's in fact this spirit of liberty which allows one to become much more creative and thus successful, even if it lasts years.

Anyway, enough about business. Today is Sunday and he is looking forward to a nice walk with his wife and the dogs. Later on, he will attend a tractor get-together and will have a good chat with some other familiar fans. Still some engines to get back to the roots!

To conclude this nice story, we wish him and his team further successful years and a nice trip!

AU REVOIR!

Ansgar Oberding

# Good advice is expensive...

## Good preparation is half the battle

You are seeking for a good advice? Well, it's our pleasure to assist you. But sometimes, there are days where we don't even have the possibility to catch a breath in between the long-lasting calls and at this moment, even you get frustrated as you can't get through though several attempts. Our telephone is most of the time busy as we have to gather lots of information from you to be able to sort out exactly what you need and for which car. Thus it costs lots of time, yours as well as ours!

**We will be therefore be grateful if you could first of all do some research about exactly what you need before calling. The reason why? An example:**

Let's take a Peugeot 504 which brakes do not work properly. There are 4 different manufacturers of brakes with their own installation system – ATE, Bosch, Bendix and Girling-Lucas. Moreover, the measurements of the wheel cylinder and the brakes drums vary depending on car type. On top of this, some brake line connectors are available in metric as well as in inch diameters. Also if the vehicle consist of a brake booster, which one is it here applied – Hydrovac, Mastervac or Teves? Depending on the marketing purposes, the radiator, the heater, the electrical systems and the brakes are all not the same. Is it built for France, Mid-Europe or Scandinavia?

As you see, without your help, we cannot achieve miracles. If you have done good research before calling, it can only be advantageous for both parties as we thus can save precious time. We thank you then in advance for your cooperation and look forward to your calls. **MERCI!**

Dear customers,

we would loved to give you a good Technical advise, but it only works with your collaboration! But you definitely know that it's the detail which causes the headaches. Most of the time for Citroën 2CV and DS, it is quite clear enough to know which parts belong to which cars but the complicated part of all this applies to Renault and Peugeot. It often happens that some parts are from different manufacturers which makes things much complicated for the Technical documentation.

It could happened that various original parts have been replaced by reproduction ones by the previous owners and that the actual owner of the car is not informed about that. We already had situations where the front brakes were from ATE and the rear ones from Lucas and all this connected with metrical and inches bolts.

It will be a pleasure for us to help all our customers with the Technical issues but it is not that easy nowadays to get everybody served. So if you do have a good know-how in automotive engineering, speak and write english fluently, do manage with telephone and computer, you are well acquainted with the rules and procedures of the EFTA countries, Net and Gross, so get your application ready and send it to us. We will be pleased to welcome you in our team.

Uptil then, please try as far as possible to define your request more precisely and get the maximum of information ready before calling us. Thank you!

# „Der Franzose“ 25 years of success – The chronicle

## 1988 – 25 years ago

The architect, Rainer Braunwald established „Den Entenmacher“ (The 2CV Maker). At that time, the 2 CV was still being built and seemed to be more interesting than the new coming cars. As the cabriolets were not yet been detected on the market, so that's how emerged the idea of developing and selling a conversion set for the 2CV. After loads of difficulties, the conversion kit has finally been approved. Number of customer in 1988: One!

## 1989

The kit has been approved. The first brochure was copied and cut manually. Three kits have been sold with an annual turnover of 5000 marks.

## 1990

The „Entenmacher“ keeps on growing, developing the wide mudguards, the wheel rims as well as the exhaust pipes. The cabriolet was fitted with 295/15 tyres at the rear axle. Annual turnover: 18,500 marks

## 1991

The first catalogue has been printed including a variety of tuning accessories for the 2CV. Number of customers: 40. Turnover: 50,000 marks.

## 1992

More than 150 clients have been acquired. The number of spare parts keep on expanding, gear box, sports shock absorber, repair sheets. Purchase of new 2CV from Belgium. It seemed that only Germans were still interested in buying those 2CV which no one else wanted. Up to now, the „Entenmacher“ has done only deficit.

## 1993 – vor 20 Jahren

Ansgar and Stephanie Olberding took over the „Entenmacher“ at a purchase price of 13,000 Marks. They then moved to an old farmer's house using a garage as warehouse for all the spare parts.

## 1994

Repositioning the company, putting more emphasis on selling more spare parts und accessories and less tuning. Next move: a former hen-house is being used as warehouse and opening of a garage to offer a better service to the clients. Annual turnover: 120,000 marks

## 1995

Smoothly getting to normal business offering more possibilities maintaining cars and for the first time, the team restored a 2CV. However the

sales average of repairs kits decreased. Through the acquisition of the company H&D Automobiltechnik, which developed and managed the Lomax since 1992, the „Entenmacher“ re-names himself as „Der Franzose Automobiltechnik“. A shop is also being opened in an old packing building which was not comfortable at all, with no heating. Although the turnover keeps on rising up and reached 200,000 marks, still there was not even 500 marks profit though the team worked 14 hours, 6 days per week.

## 1996

Next move to a new hall of 180 sqm in Vechta situated in the north of Germany. The building is much better furnished including a heater. Through the publicity via press reports on TV as well as magazines for the Lomax, „Der Franzose“ become much famous. The first part-time basis staff has been employed and the first website is online. Annual turnover: 400,000 marks.

## 1997

More and more spare parts are being offered but even though, there is no sign of profit even with 60 till 70 hours of work weekly. Ansgar Olberding built a special dolly for a film enterprise which contributes to more publicity. Annual turnover: 500,000 marks

## 1998

The catalogue contains more than 500 miscellaneous spare parts and a new kit for the pick-up is launched though the majority of the demands are for original 2CV parts. The highlight of the year was the production of the galvanized chassis after long-lasting controls by the Technical university of Hamburg. The company Stanitech in Vechta takes over the production of the chassis.

## 1999

„Der Franzose“ is being tested, approved and certified by the TÜV as well as the chassis also approved by Citroën. Meanwhile, the selections of parts keep on expanding with 600 different spare parts in the port-folio. The first 100 chassis have been sold and there was not enough time to take care of the garage. Therefore the garage has been closed to be able to put more emphasis on selling parts. The first finished website is being launched. Annual turnover: 1.000,000 marks.

## 2000

The new millenium starts still with a successful enterprise with more and more parts and new employees joined the team..

# „Der Franzose“ 25 years of success – The chronicle

## 2001

„Der Franzose“ has a variety of 1000 spare parts in the port-folio.

## 2002

In Paris, Citroën selects the project of the architect Manuelle Gautrand for his building C42 on the Champs-Élysées. In Germany, Der Franzose Automobiltechnik decides to build a new hall on a surface area of 400 sqm in Vechta, Osloer Strasse.

## 2003 – 10 years ago

The whole team moves to the new building.

## 2004

The annual turnover reaches over one million Euro.

## 2005

The selection of spare parts keeps on growing and the building has to be enlarged for storing all those parts as well as the printed catalogue. So the company decides to buy the property next to the new building with a surface area of 450 sqm. The first male colleague joins the team and the first Citroën DS catalogue is being released, in printed as well as download version in german as well as in english. Annual turnover: 1,3 millions Euro

## 2006

Move in the new building and 4000 different spare parts in the product range.

## 2007

A new logistic software is being introduced. The surface area for storing the parts is also been enlarged through the introduction of pallet racks.

## 2008

Publication of the Renault and Peugeot catalogues and addition of a surface area of 350sqm for more storage. Germany - A new rule has been introduced to the traffic regulation to slow down the pollution of the environment. Thus only vehicles with the authorized fine particles stickers are allowed to drive through different cities which are officially registered under the environmental zones. Vehicles which are older than 30 years old are thus not allowed in those zones. „Der Franzose“ thus developed the regulated catalyst for the 2CV, thus allowing those vehicles getting the fine particle stickers.

## 2009

More than 700 catalysts have been sold. The introduction of the new logistic software allows a better administration of storing over 10,000 parts in the warehouse.

## 2010

An original french joins the team and thereby permits the establishment of the branch CIPERE in Paris. A new

warehouse of 3 floors is under construction in Vechta. After the success with the catalyst for the 2CV, the catalyst for R4, R5 and R11 is being introduced. Annual turnover: 3,4 millions Euro with an export ratio of 35%.

## 2011

At the 19th World Meeting of the 2CV friends in Salbris, around 8000 2CV were expected and „Der Franzose“ distributes over 6000 catalogues within three days. The highlight of the year was the award as Top-Rating entreprise to „Der Franzose“ from the rating agency Hoppenstedt, which only 3,4% of all enterprises managed. Number of clients:30,000 with an annual turnover of 4 millions Euro.

## 2012

„Der Franzose“ has 32,000 customers worldwide, spread in more than 65 different countries. 42,000 parcels are being dispatched and 18,000 catalogues are being distributed. An off-premises warehouse with 800 sqm is being rented. The international team consists of 20 employees, speaking english, french, german, italian, spanish, creol and turkish. The 5000th 2CV chassis is being sold and once again Der Franzose Automobiltechnik is being awarded as Top-Rating enterprise. Annual turnover: 4,8 millions Euro with an export ratio of 55%.

## 2013 – 25 years later

„Der Franzose“ delivers parcels over 80 countries worldwide. Over one million spare parts, 18,000 different references are being stored in various stores therefrom 25% of those parts are being dispatched in 12,000 parcels to France. The logistic software is being completely configured. The 2500th regulated catalyst is being sold at the beginning of July and Der Franzose is certified as Top-Rating enterprise for the third time. 2 more employees join the team. Through the financial crisis in Europe, Der Franzose purchases 70,000 Peugeot spare parts, off 4,000 original upholsteries. Annual turnover: over 5 millions Euro with an export ratio of 62 %.

## 2014/2015

Actually, our team consists of 25 employees and over 50,000 parcels are being dispatched worldwide! In Autumn, we took over 4000 ignition lock and door lock from the company Neiman (original producer)! The mystery about all that, is that the company Neiman does not exist since 1983 anymore! Miracle happens on and off.

# A normal working day in the shipping department...

## A motivated and hard-working team packs your parcel for your lovely car.

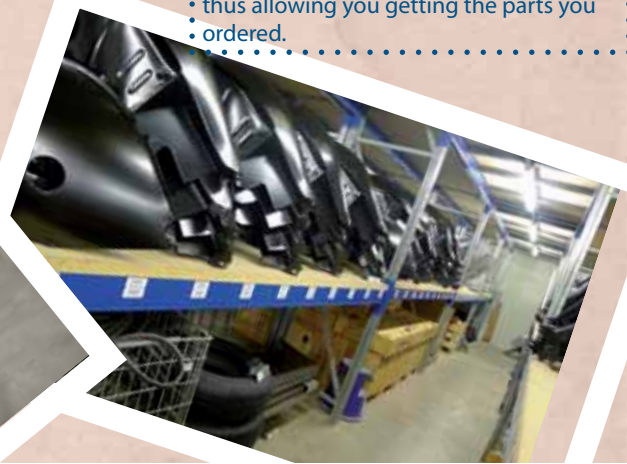

Ruth starts quite early printing all orders which have to be picked.

The bulky parts are being transported via the good's lift!

7:30 am – The staff is busy running through the warehouse of 3 floors, going up and down the whole day, picking the ordered parts from the shelves. They are merely being orientated by a computerised system, directing them via the shortest path. They are equipped with a hand-held scanner which is synchronized via a bar code on each invoice. The scanner guides them to the storage location of the parts mentioned on the invoice thus allowing you getting the parts you ordered.

8:00 am: The first orders have been picked and forwarded to the conveyor belt. The parts are then being packed and sent to the dispatching department still on the conveyor belt.

15:00 – While the DHL-Truck is only a mile away, the last parcels are being stowed on the container. Your parcel which you are eagerly waiting for, is now on the way to your place. You then receive an Email including the dispatching information, allowing you to track the parcel.

It will be a pleasure to prepare your order !

# Love goes through the car!

We are looking for the best, most original, funniest or daring vintage car photo!

Send us the most amazing photo with your vehicle and you have the chance to win:

**1st prize Voucher of 300,00 €**

**2nd prize Voucher of 200,00 €**

**3rd prize Voucher of 100,00 €**

The winning photos will be published in our

**Der Franzose- Calendar 2016.**

And who knows, ... maybe you will soon be able to tell your friends:

Look, this is my car in this calendar/catalogue.

Motives? Everything you like- everything that's fun. We look forward to your picture!

Looking for suggestions? No problem:

R4 in lavender field, Peugeot 404 at the lake, Dauphine in the mountains, Mehari at the pool, 11 CV in the city, DS at night- just the way you like it. We look forward to your picture.

To be able to print your picture we ask you to follow a few rules:

Format: please use **landscape format**, the filetype jpg and minimum **300 dpi**.

And of course, some small comments to the picture - when, where, vehicle type, year of building, etc

Thank you ....

### Used part deposit, what's that?

A lot of spare parts are no longer completely new fabricated. So special companies take back used parts to disassemble them. This single parts are going to be cleaned and lacquered, all flexible parts and pistons going to be renewed. After assemble them again, the parts are as good as new again.

However, we don't have so much used parts as we need and that is why we work with "used part deposit".

For example: A distributor sends us a renewed brake calliper. Excepting the base price, we have to pay 50 Euro used part deposit for this part.

If we send back a suitable brake calliper, the distributor repays the 50 Euro.

We are also using this method: If you buy a spare part which is afflicted with used part deposit, you have to pay the selling price and the deposit. By sending back the replaced old part, you'll get back the deposit (just if the old part is qualified for an overhauling).

## „Der Franzose“ celebrates its 25 years - the story of the boss

### My name is Ansgar Olberding, born in 1966, a child of the 80's!

At that time, the most important for me as teenager, was not to be a narrow-minded person. So after my apprenticeship as mechanist, I decided to never start any career in the automobile industry, specially Mercedes, Opel, Ford or Volkswagen. Thus my first car was a Fiat 500, followed by three Citroën for DM 300, Citroën DS and Peugeot 204 cabriolet. Meanwhile, it was as a trial to find out which profession suits me.

So I started as merchandiser in a motorcycle shop and in parallel, the number of old french cars kept on growing so that as I was 20 years old, I had a henhouse full of second-hand cars, all badly preserved. Thus I started restoring the first car and on and off, I got a request for spare parts.

I then concluded that merchandiser was not the right one for me so I started a new apprenticeship as technician for computer and office machine technology. Later on I worked as medical technician for an american enterprise. Even though, I was still not happy with my job and as young man, it was much easier to start again and keep on looking for new challenges until I discover the vintage cars industry.

Rainer Braunwald who was running a company with vintage cars, proposed me to take over his enterprise. I know him well and visited him since 1989 as we shared the same interest. The only trouble was the purchasing price, respectively DM 13,000, which was categorically refused by the bank as I asked for a credit! Somehow, we did managed to get the money, of course without the support of the bank and brought all stuffs to our flat-sharing community on the farm. After loads of discussions with the other flatmates, we could finally used the garage as office/warehouse. I could imagine that it is my dream job and my girlfriend, actually my wife supported me as well. We even dismissed our jobs to concentrate ourselves in dealing with spare parts and establish a real enterprise. In 1996, we created our website while our competitors were laughing at us, thinking about what a silly business! In 2005, we organised our first in-house exhibition, which occurs annually on the third week-end in September.

As self-employed, we have made lots of mistakes due to lack of experience, trying to solve all problems on our own! If we have to start again today, we will definitely do it again as we are much wiser and have good employees by our side.

Today, everything is perfect! We have good employees, loads of orders and we can even afford us TIME: time to enjoy our lunch without emails and telephone conversations, closing the office on time and having leisure time during the week-end! Our employees can manage without us and we can enjoy a relaxing drive in the 2CV without mobile phone, Facebook or Twitter!

My only problem is that officially I'm a merchandiser and sometimes I have to scratch my head trying to find out where does this part belongs to! But I acknowledge that many of our customers are happy to know that there is still some hope getting those rare parts. Furthermore, I must say I find it quite interesting working with an international team, thus keep on expanding.

Otherwise, I'm enjoying life how it is. I'm still getting wiser even being over 40 yrs old and I know that I can take time relaxing on the veranda with a cup of coffee, playing with the dog though keeping in mind that there are some vintage cars in my garage, waiting patiently to get screwed and get ready for a good drive. I'm not worried about business as it is running smoothly as long as the electronic keeps on developing as fast as it is since the last years. I know that there are people outside who are longing for quality rating and slowing down consciously.

I don't need any „mobile computer with 4 wheels“!

3. Right to cancel
4. Price and Delivery Costs
5. Shipment and delivery conditions
6. Liability for defects
7. Law and Jurisdiction

#### 1) Scope of Application

1.1 These Terms and Conditions of the company Der Franzose Automobiltechnik GmbH (hereinafter referred to as „Seller“) shall apply to all contracts concluded between a consumer or a trader (hereinafter referred to as „Client“) and the Seller relating to all goods and/or services presented in the online shop of the Seller. The inclusion of the Client's own conditions is herewith objected to, unless other terms have been stipulated.

1.2 A consumer pursuant to these Terms and Conditions is any individual acting for purposes which are wholly or mainly outside that individual's trade, business, craft or profession. A trader pursuant to these Terms and Conditions is any person acting for purposes relating to that person's trade, business, craft or profession, whether acting personally or through another person acting in the trader's name or on the trader's behalf.

#### 2) Conclusion of the Contract

2.1 The product descriptions in the Seller's online shop or catalog do not constitute binding offers on the part of the Seller, but merely serve the purpose of submitting a binding offer by the Client.

2.2 The Client may submit the offer by the online order form integrated into the Seller's online shop. In doing so, after having placed the selected goods and/or services in the virtual basket and passed through the ordering process, and by clicking the button finalizing the order process, the Client submits a legally binding offer of contract with regard to the goods and/or services contained in the virtual basket. The Client may also present the offer to the Seller by means of postal service, e-mail, fax, telephone.

2.3 The Seller may accept the Client's offer within five days

- by transferring a written order confirmation or an order conformation in written form (fax or e-mail); insofar receipt of order confirmation by the Client is decisive, or
- by delivering ordered goods to the Client; insofar receipt of goods by the Client is decisive, or
- by requesting the Client to pay after he/she placed his/her order.

Provided that several of the aforementioned alternatives apply, the contract shall be concluded at the time when one of the aforementioned alternatives firstly occurs.

Should the seller not accept the Client's offer within the aforementioned period of time, this shall be deemed as rejecting the offer with the effect that the Client is no longer bound by his statement of intent.

2.4 The period for acceptance of the offer shall start on the day after the Client has sent the offer and ends on expiry of the fifth day following the sending of the offer.

2.5 The contract's content will be stored by the Seller and will be sent to the Client in writing including these Terms and Conditions and Client Information (for example via e-mail, fax or letter) after the Client has submitted his order. In addition, the contract's content will be stored on the Seller's website and can be found by the Client in the customer login via the password-protected customer account, provided the Client has created a customer account in the online shop prior to submitting his order.

2.6 The Client can correct all the data entered via the usual keyboard and mouse function prior to submitting his binding order. In addition, prior to submitting the order, all data entered will be displayed in a confirmation window and can be corrected here as well, via the usual keyboard and mouse function.

2.7 The contractual language is English.

2.8 Order processing and contacting usually takes place via e-mail and automated order processing. It is the Client's responsibility to ensure that the e-mail address he/she provides for the order processing is accurate so that e-mails sent by the Seller can be received at this address. Particularly, it is the Client's responsibility, if SPAM filters are used, to ensure that all e-mails sent by the Seller or by third parties commissioned by the Seller with the order processing can be delivered.

#### 3) Right to cancel

Consumers are entitled to the right of cancellation. Detailed informations about the right of cancellation are provided in the Seller's instruction on cancellation.

#### 4) Price and Delivery Costs

4.1 Unless otherwise stated in the product descriptions, prices indicated are end prices and include the statutory value-added tax. Any possible additional delivery and dispatch costs are specified separately in the respective product description.

4.2 For deliveries to countries outside the European Union, additional costs may arise which are beyond the Seller's control. They shall be borne by the Client. Such costs are for example money transfer costs (transfer fees, exchange rate charges) or customs duties or import taxes.

4.3 Payment can be made using one of the methods mentioned in the Seller's online shop.

4.4 If payment in advance has been agreed upon, payment shall be due immediately upon conclusion of the contract.

#### 5) Shipment and delivery conditions

5.1 Goods are generally delivered on dispatch route and to the delivery address indicated by the Client, unless otherwise agreed.

5.2 Should delivery to the Client not be possible, the assigned transport company returns the goods to the Seller and the Client bears the cost for the unsuccessful dispatch. This shall not apply if the Client is not responsible for the event that entails the impossibility of delivery, or if he/she has been temporarily impeded to receive the ordered goods, unless the Seller has given notice to the Client in an adequate period of time prior to the delivery.

5.3 The risk of accidental destruction and accidental deterioration of the sold goods shall in principle be transferred to the Client when they come into the physical possession of the Client or a person identified by the Client to take possession of the goods. Should the Client act as a trader, the risk of accidental destruction and accidental deterioration in the event of a sale by dispatch shall be transferred upon delivery of the goods to a qualified transport person at the Seller's place of business.

5.4 The Seller reserves the right to withdraw from the contract in the event of incorrect or improper self-supply. This only applies if the Seller is not responsible for the non-supply and if he has concluded a concrete hedging transaction with the supplier. The Seller shall make all reasonable efforts to obtain the goods. In case of non-availability or partial availability of the goods he shall inform the Client without delay and payments made by the Client will be immediately refunded.

5.5 Should the Client collect the goods himself, the Seller informs the Client by e-mail that the goods are available for collection. After receiving the e-mail, the Client may collect the goods in consultation with the Seller. In this case shipment costs will not be charged.

#### 6) Liability for defects

The statutory consumer rights will apply.

#### 7) Law and Jurisdiction

7.1 If a Client acts as a consumer pursuant to Section 1.2, any contractual relationships between the parties are governed by British law excluding the UN-Convention on Contract for the International Sale of Goods and the courts of the State where the Client is domiciled will have exclusive jurisdiction over any dispute relating to these relationships.

7.2 If a Client acts as a trader pursuant to Section 1.2, any contractual relationships between the parties are governed by German law excluding the UN-Convention on Contract for the International Sale of Goods and the courts of the State where the Seller is domiciled will have exclusive jurisdiction over any dispute relating to these relationships.
